Scan it. Sell it. Know your stock. No monthly EFTPOS rental.

A simple counter system for small shops. Scan at the register or with a phone, take cash or card, and see your sales and stock on screen. It runs on a small computer in your shop.

No monthly rental

Card payments go through your own Square reader. You pay its per-sale fee only; no terminal rental, no lock-in contract.

Easy for staff

Big buttons, PIN login, clear change-due screen. New staff are serving customers in minutes.

Stock on your phone

Receive deliveries and do stocktakes by scanning tags with a phone. No paperwork, no app to install.

GST done right

Prices include 10% GST, receipts are tax invoices, cash rounds to 5c, and GST totals are ready for your BAS.

Reports on screen

Today's takings, cash vs card, top sellers, low stock and stock value. Nothing to print.

Your data stays with you

Everything is stored on your own computer in the shop, with one-click backup.

How a sale works

1

Put it down

Customer places items on the counter.

2

It's scanned

The bench scanner or camera reads each tag and adds it to the sale.

3

Pay

Cash with change shown, card on the reader, or both.

4

Done

Receipt printed or on screen. Stock and reports update instantly.

Your Brand POS

What's inside

At the counter

- Scan by bench scanner, webcam or phone, or search
- Cash, card and split payments, with change shown
- Australian 5c cash rounding handled automatically
- Receipts as GST tax invoices, printed or on screen
- Refunds that put items back into stock
- Warns when a price tag is out of date

Stock

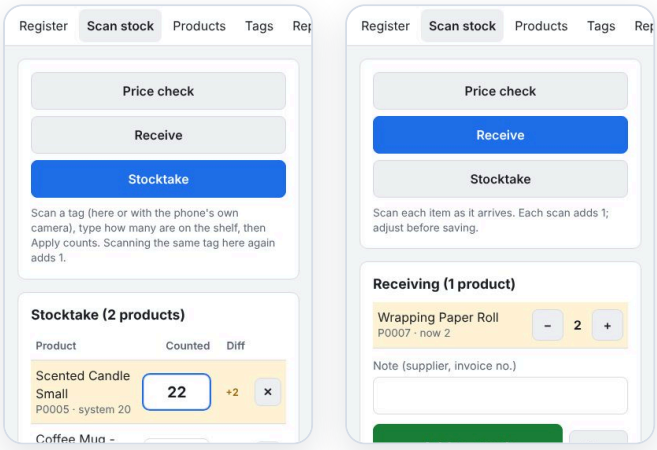

- Add products in seconds; codes created for you
- Receive deliveries by scanning with a phone
- Stocktake from a phone: scan a tag, type the count
- Low-stock alerts and full stock history per product
- Supplier codes kept on every product

Tags and scanning

- QR price tags from your label printer or A4 sheets
- A phone's camera opens stocktake straight from a tag
- NFC tags read on a counter pad, any way up **Coming**
- Hands-free counter: pad and camera **Coming**

Reports and control

- Sales by day or hour, top sellers, takings by cashier
- Cash vs card totals and GST collected
- End-of-day cash count shows over or short
- Owner and cashier PIN logins, plus an activity log

Stock work moves to your phone

Point your phone at a tag and the stocktake screen opens, ready for the count. Receiving a delivery works the same way. No handheld terminal to buy.

Every tag carries the product code, supplier code and price. The register always charges the current price.

Add when you're ready + Supplier ordering and reorder lists + Electronic shelf labels + Card reader linked to the register **Coming**

What's included

Setup
Installed on a small computer in your shop and connected to your Wi-Fi.

Your products loaded
Products entered and the first tags printed.

Training
Owner and staff shown the register, stock and reports.

Hardware, if needed
Label printer, scanner and computer supplied or specified.

See it running in your shop

Book a demonstration and bring a few of your products. We'll tag them and ring up a sale on the spot.
